

BIOSECURITY AIR TRANSPORT

Training Workshop

Roadmap For Restarting Aviation

1 DAY
WORKSHOP

This workshop will provide you and your staff with a detailed understanding of ICAO's framework for addressing the impact of the current COVID-19 pandemic on the global aviation transportation system. It includes comprehensive mitigations needed to reduce public health risk to air passengers and aviation workers while strengthening confidence among the travelling public.

Restarting Aviation

Almost every challenge in aviation requires a team effort to solve it. Today we face the biggest challenge in commercial aviation's history: restarting an industry that largely has ceased to operate across borders, while ensuring that it is not a meaningful vector for the spread of COVID-19.

Biosecurity For Air Transport Workshop

We believe that the Biosecurity for Air Transport workshop provides every role player in the industry with a roadmap that outlines a risk-based approach that assures aviation continues to be the safest form of long distance travel the world has known and that it does not become a meaningful vector for the transmission of COVID-19.

The ICAO Council Aviation Recovery Task Force (CART) **Take-off guidance** includes a detailed section on Public Health Risk Mitigation Measures, in addition to four operational modules relating to:

Airports

Aircraft

Crew

Cargo

Who should attend?

As the recovery requires a team effort, this workshop is designed to accommodate everyone working at an airport, on an aircraft or in cargo:

- Airport managers and staff at all levels;
- Airline managers and staff at all levels;
- Airline pilots and cabin crew;
- Security managers and staff at all levels;
- Cargo managers and staff at all levels;
- Technical managers and staff at all levels.

Workshop with limited amount of candidates is offered on-site, virtual or at our facilities.
